

## HOW TO INSTALL YOUR LOUIS DE POORTERE TAPESTRY ?

### INSTALLATION

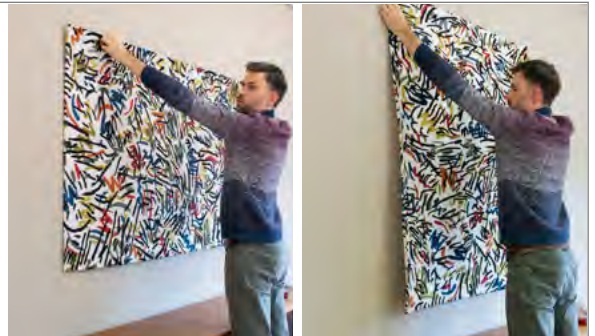

#### 1

- First make sure you have the following:
- a level
- a pencil
- a pair of scissors
- a meter
- the adhesive tape provided with the tapestry

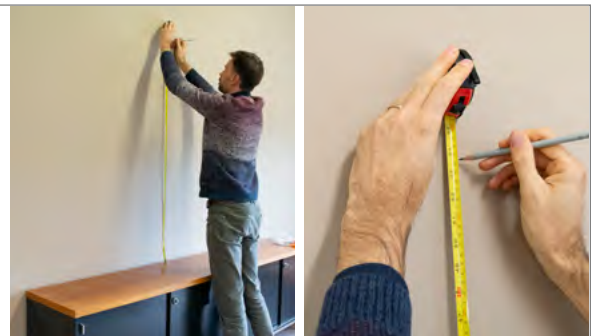

#### 2

Choose the orientation and the height of your tapestry and spot more or less its position. Present horizontally or vertically to see what is the best orientation.

#### 3

Using a meter and a pencil, draw a mark on your wall that will correspond to where you are going to stick your rug on the height.

#### 4

Draw a straight line on the wall using a level.

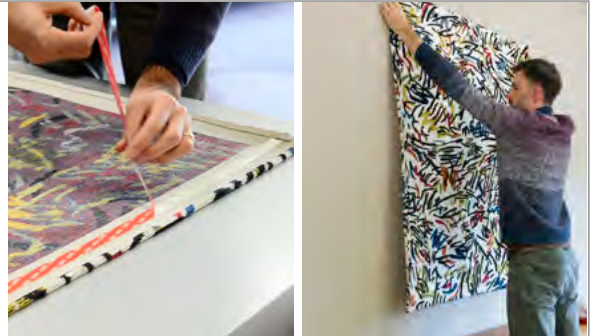

## 5

- A) First put the adhesive strip on the top of the tapestry in the middle of the confection ribbon, over the full width of the top.
- B) Cut the remaining strip in half.
- C) Fix each sticker in the lower corners.

## 6

By first removing only the protection from the top, stick your tapestry by positioning the tape on your marker line.

## 7

Finally, remove the protection of the two remaining tapes to stick the lower part of your tapestry on the wall.
